

TRACK 2 / CLOSED-ENDED VAULT / LOADED

Good assets. Put to **work**.

Agency securities lending on XRPL.

A fixed-term fund lends TBL through an agent.
The agent posts first-loss capital in the same security.

TRACK 2 / CLOSED-ENDED

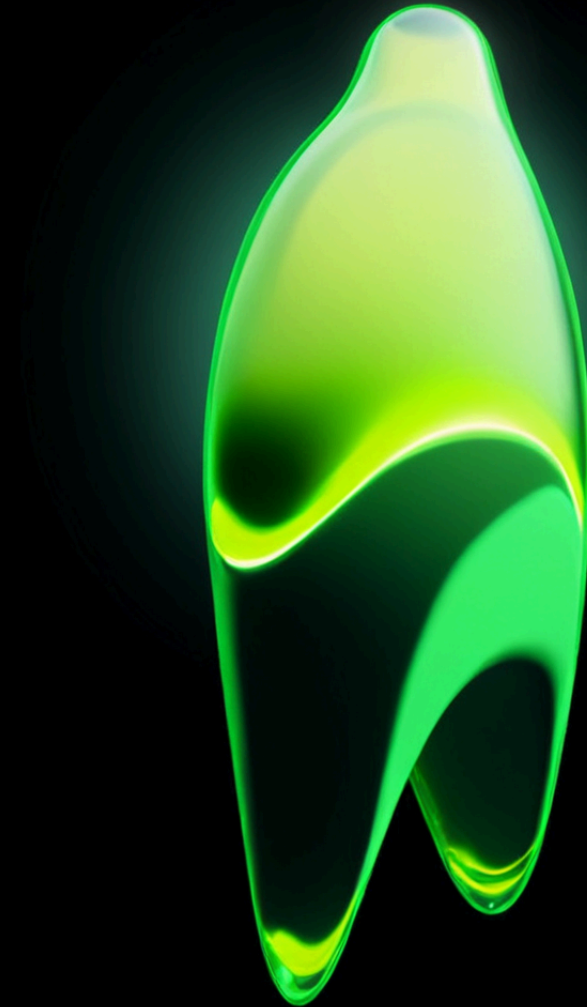

LOADED

LENDING V1.1

PUBLIC DEVNET · NETWORK 2 · XRPL.JS 5.2.0-BETA.0

README · Track, environment & trade

PATAPIM / PRODUCT & KPI

WHY LOADED / USEFUL INTEGRATION

Why Loaded.

VANILLA BASELINE XLS-65 vault + XLS-66 lending + five useful primitives

MPTs

TBL securities + USDX cash. Actual fund assets.

[Security / Cash](#) ↗

Credentials

An on-ledger eligibility attestation, accepted by its holder.

[Create / Accept](#) ↗

Permissioned Domain

Lender access: the fund shares carry the domain.

[tecNO_AUTH](#) ↗

Token Escrow

USDX cash collateral at 102% of market value.

[EscrowCreate](#) ↗

Price Oracle

An on-ledger TBL/USD price to value the collateral.

[OracleSet](#) ↗

Each extra primitive serves the trade — and exposes integration feedback.

TRACK 2 / KPI & DEMO EVIDENCE

Track 2.

Proven on the ledger.

TRACK 2 REQUIREMENT	STATUS	VALIDATED EVIDENCE ↗
Dated closed-ended vault	PROVEN	VaultKind 1 · 5-minute investment window
Deposit during Subscription	PROVEN	VaultDeposit · tesSUCCESS
Loan funded before Redemption	PROVEN	LoanSet · tesSUCCESS
Reject deposits + withdrawals in term	PROVEN	tecEXPIRED / tecTOO_SOON
Reject new loans during Redemption	PROVEN	LoanSet · tecEXPIRED
Redeem capital + accrued yield	PARTIAL	Capital returned · yield rounded to zero
Real-world dates: Fund I loan due 15 Sep; Fund II term 16 Sep–16 Dec. Cash-basis yield is recognised on payment; expected interest is not yet earned.

Fund II / Sign ↗

DEVELOPER REPORT / 1-2 + F-019-020

The right code. The wrong release.

XRPL.JS	CLOSED-ENDED TYPES	COUNTERPARTY SIGNING
5.2.0-beta.0 / brief	Yes	Wrong prefix
5.2.0 / stable	Missing	Correct
5.2.0-beta.1	Yes	Correct — already shipped

OUR WORKAROUND

`encodeForSigningCounterparty` · offline repro included

Connected ≠ able to sign.

Crossmark / GemWallet lack vault + MPT encoding.
Xaman: Devnet payload accepted. Otsu: code-inspected. Demo-key flow proven.

PROPOSED FIX Point the brief at beta.1. Publish SDK + wallet capability matrices.

DEVELOPER REPORT / 3 · F-011

Same lending flags. Different rules.

`LoanBrokerSet` against an open-ended vault.

CUSTOM HACKATHON DEVNET · 4001

3.4.0-rc1

`tesSUCCESS`

Open-ended vault accepted.

Both enable `LendingProtocol` + `LendingProtocolV1_1`.
Full amendment sets differ: 48 vs 89. The lending flags alone do not explain the result.

PROPOSED FIX

Expose the effective lending version; publish the network-to-rules mapping.

Developer Report §3 · custom-network proofs marked † · F-011 corrects F-004

PUBLIC XRPL DEVNET · 2

3.4.0-rc5

`tecNO_PERMISSION`

Closed-ended vault required.

DEVELOPER REPORT / F-013 · F-014 · F-016

The fields were there. The meaning was not.

IMPAIRMENT / WE SHIPPED THIS BUG

1.00 → 0.60

Gross assets hide a 40% write-down.

NAV = (assets - unrealised loss) / shares

LoanOriginationFee goes to the broker. Lenders earn interest, net of the agent split.

PROPOSED FIX

Link field tables to the existing formulas. Return net NAV from vault_info.

10% cover run · 100% cover run · Net NAV + cover formulas

DEFAULT / RATE AND BALANCE CAP THE PAYOUT

COVER RATE	COVER PAYS	FINAL NAV
10%	200,000	0.64
100%	2,000,000	1.00

Posted cover: 1M / 2.5M respectively.

DEVELOPER REPORT / F-018 + DELEGATION

Permissioned. But for whom?

ELIGIBILITY / F-018

Same non-member.

PATAPIM / DEVELOPER FEEDBACK

BEFORE Loan / broker ID → not found

Loan → LoanBroker → Vault

One ledger_entry lookup by object type.
Same request count for a broker; one extra hop for a loan.

- Regression tests + malformed-object guards
- Review feedback applied; local checks documented
- No broker-tab deep link yet

+

VERIFIED 2026-09-13 · NOT MERGED

DEVELOPER EXPERIENCE / THE ASKS

Built it. Fed it back.

01 Make capability visible.

SDK versions. Wallet encoders. Effective network rules.

02 Make the docs actionable.

Accounting formulas. Fee recipients. Pending amendments.

03 Make the term manageable.

Recall. Redemption liquidity. Scoped delegation.
